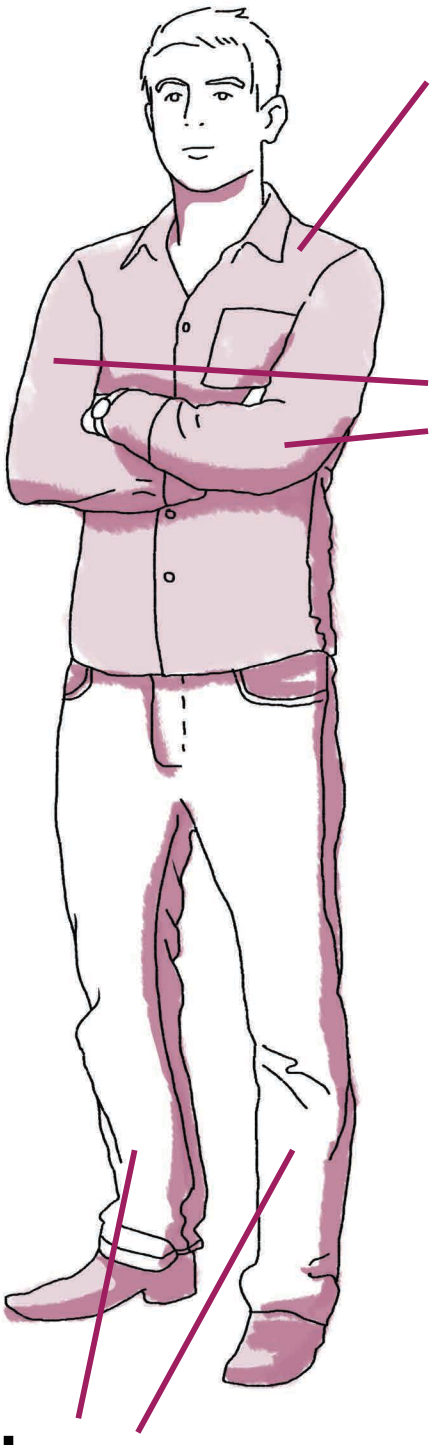
POSING MEN

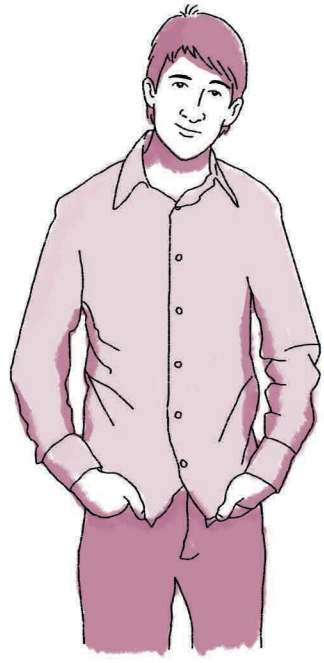


Shoulders

Shoulders should be pulled back a little.

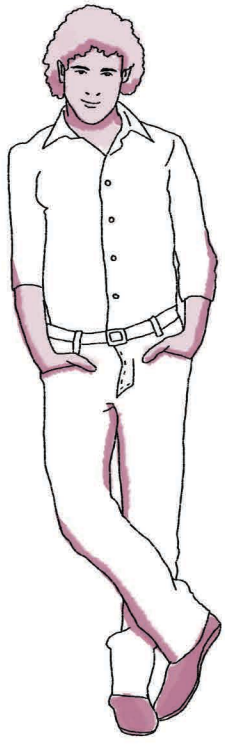
Arms

Good hand placement helps show confidence. Crossed arms work well standing.



Hands In Pockets

Placing hands in pockets shows an easy going attitude. It is very helpful for models who don't know what to do with their hands.



Leaning

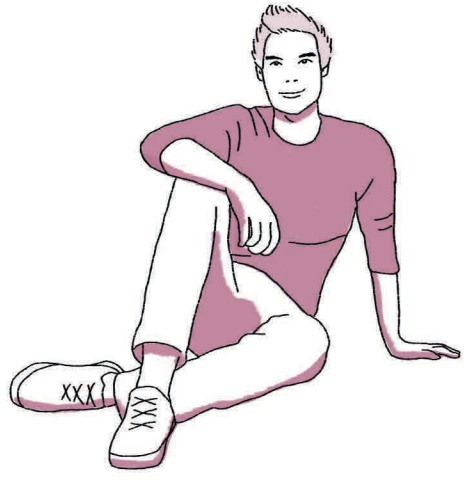
This shows that your model is at ease. Keep it natural, and use a composition that fits the relaxed scene.

Legs

Keep feet about shoulder width apart, or cross one leg in front of the other.

Sitting

When the model is sitting, have him extend at least one arm, resting it on the leg. This creates a relaxed pose by stretching the body.



PREPARING TO SHOOT
