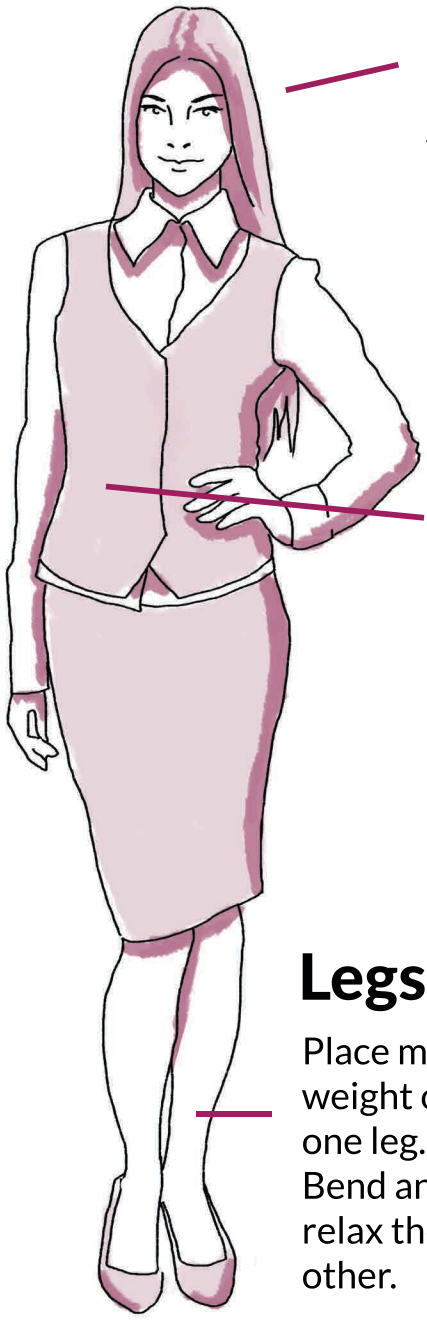
POSING WOMEN



Face

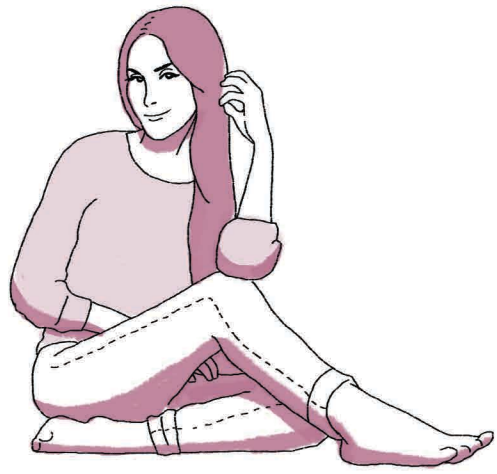
Push the chin forward, and tilt it slightly down.

Curves

Strengthen the image by using an S-shaped pose. This accentuates her figure.

Legs

Place more weight on one leg. Bend and relax the other.

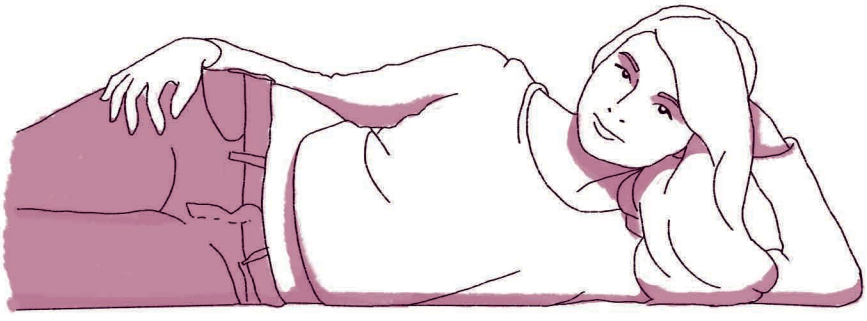


Sitting

Having the model sit creates a relaxed mood. Ensure that one leg is bent, and her back is slightly bent forward.

Over the Shoulder Look

This creates a mysterious yet natural portrait. Have the model look in different directions to mix it up.



Laying

A scene in which the woman is laying down shows intimacy. Shooting them leaning away from the camera adds a slimming effect.

PREPARING TO SHOOT
