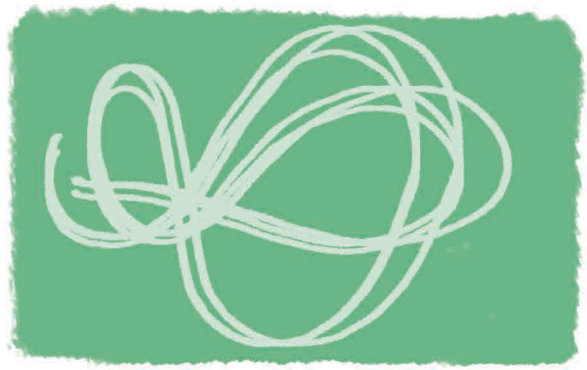
MOTION

There are two main ways to capture motion in your photographs. The camera can be in a **fixed position** capturing the subject moving, like a waterfall. Or the camera can move to track a moving object, which is called **panning**. In the second scenario, the camera moves to match the movement of the subject.

Transport

Shutter Speed: 1/15 or less
Aperture: f/2.8-f/5.6
Camera: Moving (Panning)

Light Painting



Shutter Speed: 15 secs or less
Aperture: f/5.6-f/11
Camera: Fixed (Tripod)

Water

Shutter Speed: 1 sec or less
Aperture: f/5.6-f/11
Camera: Fixed (Tripod)

Human

Shutter Speed: 3 secs or less
Aperture: f/2.8-f/5.6
Camera: Fixed (Tripod)
