PORTRAIT

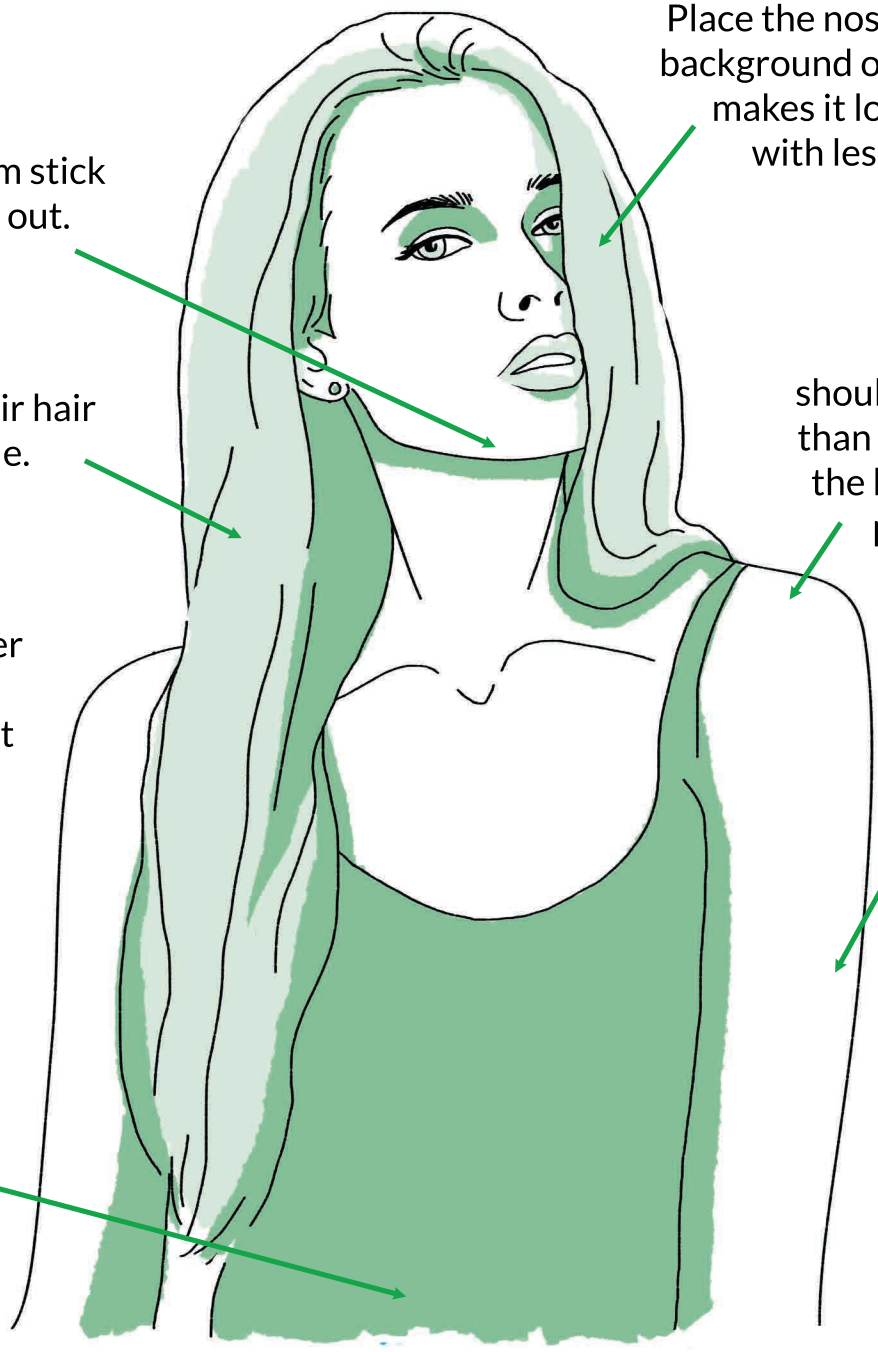
Use a tripod to fix your composition.

Use a flash to control the light.

A wider aperture (f/2.8-f/4) will blur the background.

Place the focus on the eyes.

Important to Remember



Place the nose against a background of skin. This makes it look smaller with less shadows.

Have them stick their chin out.

Move their hair to one side.

Have one shoulder higher than the other - the back one is preferable.

Remember hand placement affects body language.

Keep an eye on the size of their biceps.

Tuck stomach in if need be.

Moving the legs changes the way the hips look.
