BLACK AND WHITE

Tips

Shoot in RAW

This allows you to edit the B&W by adjusting the individual colors.

Look For Patterns

Patterns help to extenuate the interest within a scene.

Texture and Contrast

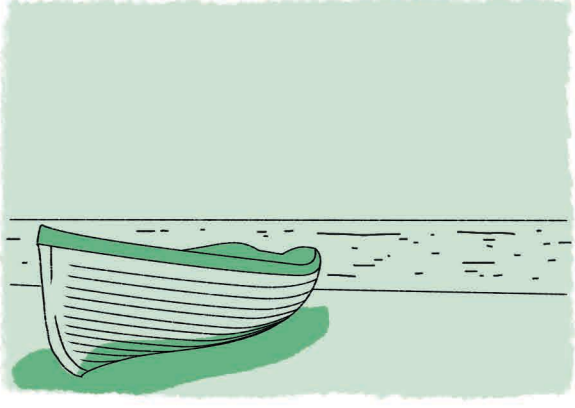
B&W is a great way to highlight the form of a subject in your scene.

Compose Your Picture

Notice how visual weight changes in black and white. Adjust your balance accordingly.

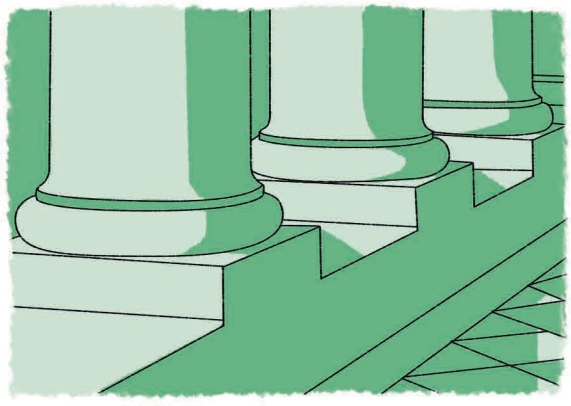
Types

Landscape



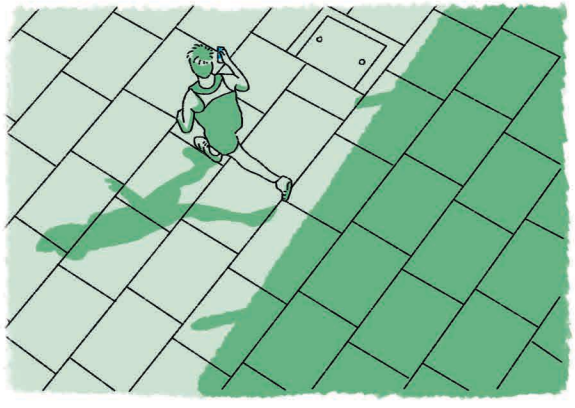
Follow the rule of thirds for interesting landscape images. Look for contrast.

Architecture



Harsh light in and around architecture makes for some interesting images.

Street



Street photography works well with textures and patterns. Find and use them.

Still Life

For still life photography, look for strong shapes and lines for the best images.
